WORKED ALL BRITAIN AWARDS

These Awards were originated by the Cannock Chase Amateur Radio Society and the Award Manager is G3ABG. The work by the Club is voluntary and profits from sale of Award Books are given 50% to the Radio Amateurs Invalid and Bedfast Club (RAIBC). The Awards are international with the aims – among others – of promoting international friendship and extending knowledge of U.K. geography.

The map of Britain is divided into a grid of 100 km squares, each specified by two letters. Each square is subdivided into 100 squares of 10 km square specified by two figures. For example, part of London 10 km square would be TQ 37. There are nearly 4,000 of these and the Awards, of which there are four, are given for confirmed QSOs in 400 (Basic), 750 (Bronze), 1,000 (Silver) and 1,500 (Gold) in a specified number of counties. For overseas amateurs the numbers of areas required are 300, 500, 750 and 1,000 respectively. Contacts from 1/1/1946 to 31/12/69 may be used provided QSL cards are available for inspection if required. For contacts after 1/1/1970 no cards are needed but signal strengths and log entries must be confirmed by two other amateur friends of the applicant before applying for the Award.

Full details of the Awards are published in a book of 120 pages, weighing 420 grams., compiled by G3ABG, printed by the Club. This also contains all county and area reference numbers with the towns etc. in each area. This is available from the Award Manager – Mr. John Morris, G3ABG, 24 Walhouse Street, Cannock, Staffs, England. The cost is 10 shillings (UK rate) or
